

To whom it concern

REACH Statement

On June 1, 2007 the new European Chemical Regulation 1907/2006, REACH (**R**egistration, **E**valuation and **A**uthorization of **C**hemicals) came into force.

The aim of REACH is to improve the protection of human health and the environment through the better and earlier identification of the intrinsic properties of chemical substances. REACH applies to manufactures, importers and downstream user of chemicals within the EU.

The first phase of REACH, the pre-registration of chemicals ends November 31, 2008. TER HELL had pre-registered all relevant chemicals within the period prescribed and will use the applicable transition periods for the actual registration.

Over the registration period we will keep track on the SVHC List (Substance of Very High Concern) to meet the information obligation set by Article 33 of Regulation (EC) No 1907/2006. In case a new entry affected a product of the Ter Group, you will receive the updated Safety Data Sheet on our own accord, provided that you have been supplied by the Ter Group with the product concerned within the last 12 months.

For more information please do not hesitate to contact.

A handwritten signature in blue ink, appearing to read "Eyck-Michael Poll".
